John Paul Tanion

Flutter Developer / Laravel Developer
Antipolo, Calabarzon, Philippines

Summary

As a Flutter developer with Laravel PHP and REST API experience, you possess a unique set of skills that make you a valuable asset to any team. You are proficient in developing high-quality mobile applications for Android and iOS platforms using the Flutter framework, skilled in programming languages such as Dart and UI design and development using Flutter widgets. You have experience working with Laravel PHP to build robust backend systems and REST APIs to enable seamless data communication between the backend and the mobile application.

Your skills in Laravel PHP and REST API development give you the ability to build complex mobile applications that require advanced backend functionality, such as data management and user authentication. You are committed to following software development best practices to ensure the timely delivery of high-quality results and are a collaborative team player who can work effectively with other team members.

Your combined skills in Flutter, Laravel PHP, and REST API development make you a well-rounded developer who can deliver end-to-end mobile solutions with ease.
